

# DN300-RN

The DN300-RN is a telemetry unit with 8 available channels that can be used for monitoring and/or control applications. The unit includes a radio that allows remote collection of data and remote control via a DN300-GW unit. The DN300-RN is used where up to 8 inputs and or outputs are required.

The DN300-RN can be easily changed to a gateway by connecting a modem and antenna. Depending on the solutions required at the site, there are a range of modules available that plug into the main board.

## Examples of applications include:

- Tank and channel level monitoring
- Weather station or weather sensors
- Soil moisture
- Flow meter, pressure sensor, flow switch
- Pump control – electric or diesel
- Solenoid control
- Water quality sensors

## DN300-RN is supplied with:

- Enclosure
- Main board
- Radio module and antenna
- Solar panel
- Battery

*Plug in modules for required solutions are an additional cost. Please refer to the module information page.*
